

**TO INFINITY AND BEYOND**

Six intrepid clue answers leave our universe (the large grid) aboard Buzz Lightyear’s rocket (the small grid). Enter them in the rocket, rather than in our universe, as entries A through F in the same order as they appear in the clues. Entries for the two shaded slots in the rocket can be deduced from crossing letters. Entries for the six now-unclued slots in our universe can be deduced from crossing letters in conjunction with a hint provided by the shaded entries. The shaded entries also describe what we suspect Buzz and his companions will discover beyond infinity. *Constructed in 2018 when Buzz was more of a thing. A few clues are rather dated.*

1	2		3	4		5	6		7	8	9
10				11					12		
13											
14					15			16			
	17
